

HIPAA COMPLIANCE SUPPORT FOR HEALTH CARE & COMMUNITY-BASED ORGANIZATIONS

HIPAA Compliance Doesn't Have to Overwhelm You

If you're a small clinic or community-based organization, you're already wearing a lot of hats. Finding the time, money, and staff to tackle HIPAA requirements can feel impossible—especially with new rules, more data sharing, and growing cybersecurity risks.

But the reality is:

- **Regulations are getting stricter.** CalAIM and California's Data Exchange Framework (DxF) mean more organizations are now directly responsible for HIPAA compliance—often moving from “business associate” to “covered entity” status in short periods of time.
- **Data sharing is expanding.** If you plan to connect through a Qualified Health Information Organization (QHIO), chances are that you'll need documented policies, clear procedures, strong safeguards, and potentially a completed Security Risk Assessment (SRA) before you can even participate.
- **Your reputation is on the line.** Compliance isn't just about passing an audit—it's about protecting the trust your patients and clients place in you.

BluePath Health makes it manageable. We cut through the complexity and give you practical, audit-ready solutions that fit your budget and capacity. From support in completing your SRA to providing the policies and safeguards you need, we focus on getting you compliant quickly, without draining your time or resources.

You focus on care. We'll take care of HIPAA.

Comprehensive HIPAA Services

Our subscription-based HIPAA support packages include:

- Size appropriate HIPAA Security Risk Assessment (SRA) and outcomes report
- Remediation planning and audit-ready documentation
- Defined roles and responsibilities for your organization
- HIPAA Privacy and Security Rule Policies and Procedures
- Ongoing access to privacy and security expertise when questions or breach concerns arise

Getting Started

Contact us today for information about how we can support your HIPAA compliance and readiness. If you've already completed your SRA, you can still benefit from our HIPAA support subscription, which gives you access to subject matter experts, quarterly updates, and optional tailored support as needed.
