

Purpose: This document compiles the codes successfully adjudicated by Medi-Cal Fee-for-Service. It outlines each code's description, the corresponding services performed in the correctional facility, and the providers documented as performing those services.

Note: This list is intended to serve as a reference based on observed billing practices and successful Medi-Cal adjudication. As billing requirements may vary by service, provider type, and setting, users are encouraged to confirm applicable requirements when considering these practices for their own facilities.
